

Where do you want to *grow*?

DataPath 

summit FSA

Summit offers flexible, cloud-based administration for healthcare FSAs, limited-purpose FSAs, and dependent care FSAs.

Streamlined Plan Setup

Set up plans quickly and easily with the help of Summit's default settings and wizards. TPAs can also create their own templates for use with other, similar plans.

Real-time Data

When changes are made in the cloud-based platform, records and data are updated and those changes are visible immediately.

Customizable Card Behavior

Customize card behavior per individual employer plan, if desired, rather than per plan type. TPAs can also edit MCCs without any need for intervention by the DataPath support team.

Go Beyond Prefunding Limitations

DataPath does not require employer group prefunding for card transactions. We assume the risk on behalf of our clients.

Powerful Data Exchange

Import plan participants and dependents, enrollments, claims, and contributions.

Plan Document Templates

Summit includes compliant plan document templates that TPAs can customize, or upload and share your own. You can also perform nondiscrimination testing in the portal.

Get Where You Want to Grow with DataPath Operations BPO

Let us handle participant enrollment, contribution processing, claims processing, and more, accurately and affordably. Free up your team to focus on higher-value tasks.

Convenient Mobile App

Our full-featured Summit mobile app enhances the participant user experience. View and update account information, check balance and transaction status, submit claims, and upload receipts directly from mobile devices.
